## **DETAILED ACTION**

# Response to Arguments

Applicant's arguments with respect to claims 1-11, 13, 22-32 have been considered but are moot in view of the new ground(s) of rejection. In addressing the newly added requirement of automatic classification, a new reference has been provided as prior art to the pending claims.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/721,827

Art Unit: 3737

Claims 1-11, 13, and 22-32 rejected under 35 U.S.C. 103(a) as being unpatentable over Uppaluri et al (US 7,263,214 B2) in view of Sato (7,403,646 B2).

Page 3

Uppaluri et al disclose a method and system for obtaining dual and multiple dual energy images, extracting features of those images, and processing those regions to determine edges (Col 4 Line 10-Col 6 Line 35), abnormalities, motion artifacts (Col 2 Line 40-Col 3 Line 45), and classify those images for display (Fig 9) to a diagnostician. Uppaluri et al disclose methods which include break-point analysis, histogram display, normalization, feature classification (Col 5 Line 50-Col 6 Line 65), edge smoothing, subtraction (Fig 2), segmentation and thresholding (Col 5 Line 20-49), and also candidate pixel identification algorithms for feature extraction.

Uppaluri et al discloses all that is listed above, but does not disclose specific symbol display, shift vector processing or setting specific break values for gray level processing. Attention is then directed to the secondary reference to Sato which discloses diagnostic symbol displays (F1-6c), shift vector processing (s201-206) and gray-level histogram (Fig 3, Step s400, s804-806, 801-808 for analysis steps) and associated processing for dual energy diagnostic images. It would have been obvious to one of ordinary skill in the art at the time of the invention to have utilized the breakpoint analys and difference image analysis of Sato with the methods and system of Uppaluri et al for the purpose of facilitating analysis of a changing pathology via image processing (Abs, background).

#### Conclusion

Application/Control Number: 10/721,827

Art Unit: 3737

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Page 4

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOEL M. LAMPRECHT whose telephone number is (571)272-3250. The examiner can normally be reached on 8:30-5:00 Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian L. Casler can be reached on (571) 272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
